AutoCAD Crack + Product Key [Mac/Win] [April-2022]

Source Code Information Any version of AutoCAD that is available on the market can be freely modified by an individual with little to no technical skills. The source code for AutoCAD and many other Autodesk products is made available by the Autodesk as freeware, under the GNU General Public License (GPL). This makes it possible for any developer to make their own modifications to the code. However, the GPL license does not allow the creation of software that claims to be AutoCAD, as this would be considered a derivative work of AutoCAD, not a separate original work. AutoCAD LT is not available in source form, and the programming interface is not easily accessible. Licensing AutoCAD runs on many different platforms, including 32- and 64-bit Windows, macOS, and Linux. Windows and Mac OS X AutoCAD runs under the operating systems Microsoft Windows XP SP3, Vista, 7, 8, and 10 and Mac OS X 10.6 or newer. It has a dual license: both the AutoCAD program and the version of AutoCAD running on a computer. If you have AutoCAD on two machines at the same time, and you do not turn off one version when working on the other, you are violating the licence. If a user has the Premium and Ultimate versions of AutoCAD running at the same time, and not turned off, they have four licenses. This is the reason that version numbering is used instead of the usual 0-9, which would result in a number indicating more than one version. Windows AutoCAD can be purchased in either the full version or in the subscription version. If the user is purchasing the full version of AutoCAD they are given a serial number which is specific to the user. This is referred to as the Autodesk Key. This key can be used to unlock additional features of AutoCAD (especially the usage of databases and sub-programs, as well as the ability to modify the software). The key is encrypted using a user-defined password. The full version of AutoCAD costs USD \$399.99, and the subscription version costs USD \$249.99. Mac OS X AutoCAD runs on the operating systems macOS 10.4 or newer. It is available in the full version and the subscription version. The full version costs USD \$399.99, while the subscription version costs USD \$249.99 a1d647c40b
