Field of the Invention The present invention relates to a fluid resistance force setting apparatus to be used in order to obtain a desired fluid resistance force when an object is dropped or the like. 2. Description of the Related Art Conventionally, in order to obtain a desired fluid resistance force when dropping an object, as shown in FIG. 1A, a fluid resistance force setting apparatus with fluid control valve (shown in Patent Document 1) is known. This fluid resistance force setting apparatus 101 comprises a fluid control valve 105 and a power supply 106. The power supply 106 is connected to a drive control section 103 through a power supply line 115, and a control signal is outputted to a drive control section 103 through a control line 111 from a control section 102. The drive control section 103 drives a fluid control valve 105 according to a control signal received through the control line 111, and supplies and discharges fluid to a plurality of fluid chambers 104 through a fluid supply and discharge line 122. In this way, it is possible to supply and discharge fluid to and from a plurality of fluid chambers 104 to adjust a fluid resistance force..
