Q: Using keys to select a key using a value The following code will return the first key which is a quantity in the value:- `db.getCollection("stored_quantities").find({'pos': 50})` It works fine. How can I make it return the key which contains the quantity value. e.g. If I have the following documents: `{ 'pos': 50, 'quantity': '39', 'details': 'Some details here' }` `{ 'pos': 10, 'quantity': '67', 'details': 'Some details here' }` `{ 'pos': 20, 'quantity': '8', 'details': 'Some details here' }` `{ 'pos': 10, 'quantity': '67', 'details': 'Some details here' }` `{ 'pos': 10, 'quantity': '67', 'details': 'Some details here' }` `{ 'pos': 10, 'quantity': '67', 'details': 'Some details here' }` The result in this case would be: `{ 'pos': 10, 'quantity': '67', 'details': 'Some details here' }` A: `db.getCollection("stored_quantities").aggregate([{ $match: { 'pos': 50 } }, { $project: { _id: 0, pos: 1, quantity: 1, details: 1, someotherdetails: 0cc13bf012`
