**The key aspect of the game is the role-play system, wherein the main characters are completely aware of each other and share their emotions. When you equip an item, you are not simply enhancing your character's appearance or ability, but you are actually taking over the role of a particular character. For example, by assigning the "sword" role to the character whose role is "self-centered and aggressive", your character will become self-centered and aggressive. Similarly, by assigning the "sword" role to the character whose role is "carefree and cooperative", your character will become carefree and cooperative.**
