Analgesic effect of intrathecally administered bupivacaine in man. The analgesic action of intrathecally administered bupivacaine was investigated in ten healthy male volunteers. The first experiment was a double-blind, randomised study comparing intrathecal bupivacaine with intrathecal saline. Bupivacaine (15 mg in 1 ml) was injected intrathecally and graded pain from 1 to 10 was scored on a visual analogue scale. The results showed that pain scores were significantly higher for the bupivacaine group than the saline group between 5 and 10 min after injection. The second experiment was double-blind, randomised and controlled study comparing intrathecal bupivacaine (15 mg in 1 ml) with intrathecal morphine (1 mg in 1 ml) given via epidural injection. Pain was assessed again. After intrathecal injection of bupivacaine, there was a

significant decrease in the pain scores after 1 min compared with the epidural group (P less than 0.05). Intrathecal bupivacaine, however, was found to be less effective than morphine in producing analgesia when the effects of the two agents were compared using the EC50 (corresponding to 50% of the maximum effect of intrathecal bupivacaine) and E50 (corresponding to 50% of the maximum effect of epidural morphine). The differences in EC50 and E50 between the two groups were statistically significant. The onset of action of intrathecal bu

The Nordic community is still alive and well, right? I mean, I haven't been able to post about our events for a while, and we don't seem to have a big event coming up in the near future. In an effort to bridge that gap, Sigrid's friend Kaya started a free art weekly that takes place once a week, on Monday. I've been invited to be a regular artist, and I'm excited to have a chance to showcase the work that I do. I'm also thrilled that Kaya has decided to post my work on her website. Look! it's one of the new crop of Seven White Peonies - hand painted by Nino Kao, a contemporary glass painter from Tartu. He's one of the most talented glass artists I've met. He uses minimalist geometric designs and shapes to form visually captivating patterns, and he's won a number of awards for his work. I have a couple pieces in this collection, but I'm excited to see how my work evolves. If you like what you see, make sure to check out Kaya's website. Don't forget to check out the hashtag #freeartweek. I'll post my own work there, and you're free to do the same! As you may or may not know, I have
