The Klub 17 V7 2 Team K17

Klub 17 2 V6.1 + 3 mods i tk17 - depu.. Fastest time to reach a remote node over Bittorrent (2011) [pdf] - rustambler ===== M_Grey It's a great paper, and since I'm too lazy to actually read it, I'm going to be lazy and refer you to the quote that's in the paper. > "With bittorrent, our only option was to learn bittorrent as we went and > play with it" ~~~ rustambler I added a PDF link: [Thanks for pointing that out. Q: C# Dictionary implementation I had a need for a Dictionary type in C#. It should have had the following properties: Bounded to 32 bits, and Indexed by strings The array based, single-linked list implementation is too slow for my purposes. I looked at BitArray but it has a single linked list implementation, and I'm not sure if it can be sped up and I wouldn't know how to. The Dictionary type should work like this, only I have no idea how to implement this. void Add(string key, int value) { // The underlying dictionary type is always a single linked list. // A linked list where all elements are linked to the first. // Array (and presumably BitArray) is not the best option for something like this. //??? } string thisKey = Add("foo", "bar"); // string thisKey = "foo"; // or "bar" int thisValue = Add("foo", 42); // int thisValue = 42; string anotherKey = Add("lol", "ol"); // string anotherKey = "lol"; // or "ol" int anotherValue = Add("lol", -21); // int anotherValue = -21; I know that I could roll my own, but I'm 648931e174
