After booting into Windows 10 Version 1803, i tried to install the Windows 10 Fall Creators Update and it. Have a problem with Windows 10 Fall Creators Update? We are here to help you! .Q: How to add fix the toString() I have a function that returns String with StringBuilder() public static String convertToString(Object obj) { StringBuilder sb = new StringBuilder(); if (obj == null) { return ""; } sb.append(obj.toString()); return sb.toString(); } But this function doesn't work. Every time I'm trying to convert the object to String using this function, I'm getting [Ljava.lang.Object;@f549c64 What can I do? A: From the JLS (§4.12.5): The toString method for class Object returns a string consisting of the name of the class of which the object is an instance, the at-sign character `@', and the unsigned hexadecimal representation of the hash code of the object. In other words, this method

returns a string equal to the value of: getClass().getName() + '@' + Integer.toHexString(hashCode()) Using this method would give you the class name, the at-sign character and the object's hash code. Q:
