See here: [Changing the App Icon on Android O From the documentation](#) Starting in Android O (API level 27), the system will no longer change your app's icon on the home screen when the app is updated and the package name

changed. While you can still change the app icon in the Play Console, you cannot use this feature to update the Play Store icon or to support runtime App Store policies like the App Ratings and Spotlight screen. So change the icon in your manifest with your new icon and when you run your app in developer console, you will see the new icon in the manifest. But the old icon will not be changed in the Play Store. Ekiti State University Ekiti State
