Hi thank you for your request. You can find application in the site download. Will be pleased to meet you again. Yours, Vladchenko. Yura Hi I have the same as this man, I have posted in the page download, and I have waited for a answer, and now I do not have a reply of the person who sent me this question, I have more than 100 owners of this software and I think you are making a forÃstÃind the software but not for US. If you can tell me how to download do not write to me, I will be very grateful. Thank you. Hi what r u waiting for? Have u read the page that i posted? I can not understand by how you said u do not have a reply, i did already read, and i can not tell how to download it. The best solution to remove redundant windows registry entries is Reimage. This will save you time and effort and drastically improve speed and performance. A PC that has been properly maintained can last 10 years or more. The only time it is recommended that you perform a registry scan in this timeframe is if you are experiencing a large amount of errors. In this case we recommend a complete reimage. Remove Duplicate Entries in the Windows Registry Reimage is a Windows repair tool. When you download

Reimage, you will be able to run a scan and have it detect all of the registry errors on your computer. Next, you will be able to schedule a time to run a system repair so that Reimage can backup, identify and fix all registry errors. You can also prevent reoccurring errors from occurring by selecting different registry repair options to customize your scanning results. Here is what you can do to prevent problems in the future: Downloading and installing updates Updates are usually automatic and require no action on your part. However, we recommend that you leave one program or another running so that you will be notified of updates. These items are strictly optional. Running scheduled scans Create a schedule that matches your own daily routine. For instance, you can have your PC scan when it boots up in the morning and again after midnight. Managing startup items and services Startup items and services are applications that are automatically started when Windows starts. You can either disable or delete them. Deleting old entries When you no longer need
