Category: Endocrinology to mean "a course of medicinal treatment which does not consist of the use of a particular drug, but rather includes any and all phases of an illness." id. at *5 (quoting Dorland's Illustrated Medical Dictionary 828 (27th ed. 1988)). See id. (comparing "pharmacological therapy" to "most of the drugs generally used in a hospital"). As the record does not show that the hospital administered a "pharmacological treatment"—and the painkiller Panadeine-Sodium is not a drug, the majority is also correct that the claim would still fail even if Panadeine-Sodium could be construed reasonably as a "pharmacological treatment." Panadeine-Sodium, as described by the record, is merely a flavoring used in soft drinks to make them more appealing to children. See id. at *4 (explaining that Panadeine-Sodium is an "ingredient in ingredients as a flavoring"). It is a product used in the production of soft drinks—not a medicine used to treat specific medical conditions. If anything, Panadeine-Sodium is categorically distinct from opioids because the former can be consumed in myriad non-medical contexts. Because Panadeine-Sodium is not "a drug prescribed" by the hospital, I respectfully dissent. A true copy. Attest: CLERK, U.S. COURT OF APPEALS, EIGHTH CIRCUIT. -4- The genetics of the blood is described in, for example, "Blood Cells, Molecules and Diseases," 3rd ed. by Manfio, Blackwell Science (2000). The coagulation cascade that results in platelet activation is described in, for example, "Haemostasis and Throm
