Secure Pack Recovery Crack License Key Free [Mac/Win]

Secure Pack Recovery is a standalone PowerPoint recovery solution tool that was designed to rescue your information out of a Secure Pack Archive file. One of the options to use with this program is the ability to extract all the contents of a Secure Pack Archive file. This program was designed specifically to rescue all your files and not just the original presentation file. The only drawback to using this program is that the file that is extracted must be viewed on a Windows-based machine (Xp, Vista, Win 7 and others). It must also be noted that this program does not allow access to sensitive information to authorized/used number of presentation runs. This program is free to use and has a 30 day trial mode. As of version 1.2 there are more PowerPoint Recovery Options in a menu for you to choose from. This included the option to choose which files were to be restored. You can also easily remove the password and extraction/run limitations if you so desire.
