Document Printing Starting with AutoCAD 2012, there is support for the Windows Printing System, Windows Printing Services and Windows Print Management API (PnP) which allows for printers and multifunction devices to be connected directly to AutoCAD. In the same AutoCAD 2012 release, the ability to print a diagram or drawing was introduced with the AutoCAD Raster, which allows for the use of PostScript and PDF printer drivers. It is possible to save a diagram as a file type that can be printed in postscript or PDF format. Other printing features include the ability to place line art over an existing PDF document, the ability to print certain entities in an annotative form, and the ability to annotate a document in AutoCAD and save it in various ways. It is also possible to print drawings or project files using the EOS (End of Schedule) task. In AutoCAD 2013, the ability to read PDF documents and drawings was introduced as well. DXF and other file formats Most AutoCAD files (.dwg) are in the DXF (Drawing Exchange Format) file format. The file format was defined by the AutoCAD Architecture Standard (AAS) version 1.0 and includes the following elements: Architecture information. Drawing context. Drafting layer. Feature and sectioning. Layers. Vector information. Structural information. The DXF file format can be used to edit and view most AutoCAD files. It is not limited to architectural drawings; however it is used by most of the other files types. Other file formats supported by AutoCAD include PDF, ASCII, MDS, PNGE, PNGE2, PNGL, PNGL2, PNML, PNML2, PNT, PNT2, SGML, XPL, and XPL2. DXF files are portable across a broad range of Windows and Mac platforms. However, version 2.01 and later of Autodesk DWG Viewer is required for viewing DXF files on the Mac platform. This is because many of the tools that are used to prepare AutoCAD drawings do not support the original DXF 1.0 format. Applications AutoCAD is a commercial product from AutoDesk that is sold by Autodesk. It is available in both Windows and macOS versions. Both versions of AutoC ca3bfb1094
