Basically, I have the following code in C#. private void btnClose_Click(object sender, EventArgs e) { var variable = ""; switch (variable) { case "userinput": MessageBox.Show(variable); break; case "userinputname": MessageBox.Show(variable); break; case "userinputm": MessageBox.Show(variable); break; } } However, the switch statement doesn't work as expected. It only detects the case of "userinput" but won't detect any of the other cases. Why is this happening and how could I fix it? A: Define the variable as
