What's new in Rogue Command:

ers has been in development for two years now, and even though it has been able to beat its deadline and release in June of last year, the game just recently hit its release milestone in Steam, arguably the world's largest and most expansive digital gaming platform. It's a game that, according to Elite's creative director in North America, Matt Bromberg, was a labor of love for its developers. "We wanted to be friendly to casual players and ensure they could enjoy the experience we're aiming for. And when it came time to build what I think is the most ambitious space game to date, Rokugan's larger scale was a natural fit." Players have been customizing their Imperial and Clan forces in the game's closed Beta and testing phases, but the game is set to become even more flexible once it releases, as the Foundry, the structure through which players navigate the game world, is being expanded. We've been lucky enough to speak to Matt Bromberg and Joe Armstrong, Executive Producer at Frontier Developments, about the game and how it differs from Elite Dangerous, confirming some popular expectations, and what's coming in later updates to this massive universe. SpaceX launches two Falcon 9 rockets simultaneously with Dragon capsules at Cape Canaveral. It always feels like Frontier Developments is on the horizon looking to build another game on the huge success of Elite Dangerous, so we had to ask Matt Bromberg about the plans of the studio for the foreseeable future. Frontier Developments have already released Frontier: First Encounters at the start of this year, and although it's unlikely that it will supplant Elite Dangerous in player interest any time soon, it does give us an idea of where Elite is going in

the future. As well as the core Elite Dangerous point that new Elite players will acquire as they add to their fleet, Frontier is filling
