Reviews KOTAKU (European) 7/10 "My first Neko Navy review. It`s a good one. Neko Navy is first of all, a good shooter. Easy to play, with some challenges for the high-level player. It`s a great video game. The graphics look like a hand-drawn cartoon. The music is a nice soothing and relaxing melody." KOTAKU (European) 7.5/10 "The controls are not the most intuitive, but when you get used to it, it can be a lot of fun. It`s one of those games where you take off, play with all kinds of enemies, dodge them all, and eventually you take your last breath, I mean, you kill them all. Just plain awesome in general. A visual, enjoyable, simple, and fun game that won`t leave you bored." GAMERSOUND.NET 8.5/10 "Neko Navy is an exciting first-person horizontal scrolling shooter with an original art style and charming musical accompaniment. The player controls a small cat that has adopted a crew

In the game, you have to feed all the zombies by eating brains, allowing you to advance to the next level and grow in experience and skill with each subsequent level.5/5 Crave Submitted by: Michael F. Schwartz, 13/02/2014 Gameplay: Experience a very fun game with a strong horror motif. The story is decent, the difficulty is just right, and the game itself is addicting.1/5 The Humble Opinion Submitted by: Thomas F. Goodman, 30/01/2013 Gameplay: Well, its hard to explain. Its a game where you must eat brains to stop a zombies and you need to kill them by eating them. Once they die, the game is over. Its hard to explain, but its a fun game. I recommend it.5/5 Submitted by: Michael F. Schwartz, 18/01/2013 Gameplay: This game is the most brutally mindless game yet, but it is still extremely fun.1/5A Fork in the Road I received my first rejection letter for a grant, a letter I was quite distraught over, as I was trying to make the point that we're all changing. I thought I'd take it easy, and get everything done as I thought I'd be going back to India soon, but things didn't quite happen that way. I had to go through the grant process and undergo the same stress of long-drawn out grant processes, worry about when your paper will come out, etc., all the while, knowing that some people's lives are at stake, some people whose situations do not merit US grant money. We have so much that we could do to help poor women in India, they don't

need US money, but because we are an imperialist power, we have to try and look at these things in the best possible light.

We try and give the money to the ones who need it the most, the ones who are suffering more, but it is such a dubious process that I didn't even want to go through the hassle of applying for a grant, after all I had gone through a grant process in India. Of course, I felt bad about not having gotten the grant, because it was a position of power, and I had put in a good paper, and I felt I had let myself down. But then, I didn't

Karanos Solitaire is an adult puzzle game being developed by Mattimino and released on 15 January 2015. The game is currently in its release phase with eight puzzles. Apart from the puzzles each game sequence consists of a musical soundtrack that increases in tempo as the game progresses. The game design is based on the notes of the musical scale, and each puzzle is solved in under 5 minutes. Gameplay The game has eight unique puzzles with over one-hundred visual clues. The core mechanic of the game is a solitaire puzzle game where each player has 4 cards which represent notes in the scale of C Major. The goal is to find the sequence of cards that form the correct musical melody. The game has two musical tracks with over 270 notes, and the players need to find a sequence of notes that they think is the song. Each puzzle has 4 comments allowing for a maximum of 40 comments per game. Each player has unlimited lives and clues that can be used. Each clue has a time limit and each player can unlock more clues by purchasing the unlocking advance every level, as well as purchasing hints via a shop. In a later update Mattimino added timed hints which you can purchase online. During a press conference about the game, Mattimino mentioned that he was aiming for a sound quality in-between TIGA's SHELLS and SECRETS 3, but that his games aim for a higher than average difficulty compared to those games. Development Karanos Solitaire began as an independent project called Solitaire Academy. Mattimino, at the time an independent developer, released Solitaire Academy in late 2011, with a music system called "Animation", which he intended to be a music meets visual exploration game. After Solitaire Academy released, Mattimino set up a company in France named B1 Productions for the release of Karanos

Solitaire. Development for Karanos Solitaire began at the end of 2012 and the game was initially planned for a 2014 release. Mattimino decided to change the name of the game to Karanos Solitaire, claiming it would sound "logical" and solid. The game, in an effort to control the in-game currency, was planned to be free on Steam, however a store was added in the late February 2015. In the first release a bug was added which caused the game to stop playing after three seconds. Mattimino was quick to point out this was a pre-release bug and was fixed
