A modern soundtrack for a twisted and deadly cyberpunk game. The game is built with modern technology to provide a chilling experience. But all those features are pointless if the soundtrack doesn't match the atmosphere that the game is trying to portray. So this is the first time you can listen to an original soundtrack specifically for a game, hopefully it will inspire you to create your own tracks. Rifle Storm is a modern cyberpunk shooter game, the game has a deep storyline full of amazing characters, it has many twists and turns. Also it has a great new addition, the ability to customize your rifle. You start the game with a basic rifle and you level it up as you play, by upgrading it you will end up with a custom rifle that suits you more. So if you want a gun that is perfect for you, this is the game

for you. It allows the user to play fast-paced shoot-em-up, but at the same time very atmospheric and to take advantage of the new weapon customization mechanics. You'll have to move fast and use your environment to your advantage. You need to master the weapon as well as become a great sharpshooter. Playing Rifle Storm is as much fun as shooting, but is also a very challenging game, you'll need to be both skilled, smart and patient. You will need to get used to a new control scheme, new graphics engine, using a weapon that isn't exactly the same as what is used in other modern shooters, such as ones from Call of Duty or Gears of War. You'll need to master the new controls, get used to the graphics and put all your skill to the test. Because if you do not, there is a good chance that you will die in the game. COACH TWEET: Trusted app for monitoring and measuring oncology patient health

COACH TWEET: Patients with breast cancer and their oncologists are relying on a mobile app called oncoCoach to communicate regularly about treatment and other medical conditions, which have caused data breaches at medical institutions worldwide, according to a recent Wall Street Journal article. Women with breast cancer use oncoCoach, available on iOS and Android, to share data with their doctor and other providers. The iOS version, made

by Tectia, has been downloaded more than 300,000 times, the Journal reported. The app was inspired by research showing that regular communication between patients and oncologists helps make treatment more effective and safer.

Q: Convert a stream of arbitrary depth to byte[] I am attempting to convert a stream of arbitrary depth (think zip file) to a byte[]. The following uses a simple iterator to convert each line of the stream to a byte[]

```
Iterator iterator = Files.walk(Paths.get("path/to/file")).filter(file -> file.isFile()).iterator(); try { byte[] bytes = new byte[file.length()]; while (iterator.hasNext()) {

What's new:

: the new Frontline Magazine Compiled by Tiffani Zumberakis The only thing more valuable than art and photography is perspective; the innate ability to see the world both critically and personally. Whether you draw, paint, shoot, or whatever you do, those that are able to dissect, criticize, and understand a work of art have one over the people who can't. Without the ability to

take something that moves, or is placed on a wall, and reveal its possibilities, you'll never be able to enjoy it as much as someone who sees what it could be. There is no value in whether or not you like the thing we see in our world because, sooner or later, we'll be gone, and they can do whatever they want with it. While the judgment of art is of great importance, the ability to see art through a lens isn't exclusively limited to the world of art. This is the perspective of the new print publication *Floor By Floor* by PJ Solomon of Public School magazine. *Floor By Floor: Issue No. 1* covers drowned neighborhoods and vibrant blocks, each individualized through a narrative approach to the city. What's most exciting about this is that not only does Solomon look at the themes through her unique, personal lens, she's not afraid of critique. Creating a publication that really is a critique of Brooklyn in many ways and yet its critique is about relatable material, rather than a blatant facade, this is a publication that brings the subject matter home. Not only does Solomon want to give a voice to a sense of insight that is often overlooked, she wants to call attention to the vital information of our city. Included in her coverage is the neighborhood film festival, *Neighborhood Matters*, seemingly everything but the kitchen sink that affects the light industry in Brooklyn: barbershops, bars, shops, theaters, retail markets, coffee houses, markets, laundromats, restaurants; everything that makes the city vital and not just a place for those who live there. Situated in Bushwick, Brooklyn, this is a tough neighborhood to cover. Not only is it full of utter poverty and economic struggle, it's consistently been the target of gentrification and flood olympics. Nobody wants to come here. It's your neighbor, the old butcher-chicken fight. Back in the day, we all wanted to be a part of the old neighborhood and make it our stomping grounds. However,

“Gunst & Suzen” was a one-man project, Niklas Gutters, who started out in 2006 as a professional dancer and choreographer. He went on a different path once he started making a few steps in the electronics arena. His old band, “Gunst & Suzen”, released his first five tracks in the early years of the 21st Century. After years of traveling around the world and working on projects here and there, he retired from music in 2013, and focused on the development of “AOX”, a unique hybrid AR/VR-based software. This project brought him back to his passions, his roots and his previous musical career. The rest, as they say, is history. “Urban Pirate” is the new musical project from

Niklas, and it is a highly professional collaboration, featuring guest vocalists and musicians. Niklas hopes to release one song per month, and is releasing all his material in Apple Music. Warner Brothers' casting director has found a new protag for the It adaptation: Jacob Tremblay, the 21-year-old star of 2015's Room (and in a few tiny shorts before that, most notably in the 2009 film Key & Peele) is joining the cast. Tremblay will play Richie Tozier, the bully/murderer who is the star of the scary clown meme and who dies by scaring Richie Tozier out of his own body after Richie becomes the clown. The film follows a bullied high-school student who becomes the clown wearing a red-and-black

striped suit. His acts of terror include a sewing machine attacking his schoolmates, and he is eventually captured by the police and given the death penalty. The film is set to be directed by Andy Muschietti and will be Muschietti's feature directorial debut. He is also co-writing with Barbara Muschietti. The cast also includes Bill Hader, James Ransone, and a few more actresses (Irena Medziniuc, Evangeline Lilly, and Kyla Kenedy, among others) also mentioned on the press site. This is the first major cast shakeup Warner Brothers' It adaptation has had in recent memory. The studio signed Muschietti last June to direct, and studio execs were
