What's New In AutoCAD?

Add annotations in your document by moving your cursor over the section of interest. Edit or make comments on screen or send them as mail attachments to anyone else. (video: 3:52 min.) Faster and easier workflow: After you save your work, AutoCAD 2020 will do more of the work for you and will offer a faster workflow. For example, after saving a file, AutoCAD will immediately search for a sample, automatically change the shape of the default grips on the toolbars, automatically change the default font style and size, and ask if you want to accept the new settings. (video: 1:54 min.) The Task Manager: Make the best use of your computer resources by easily managing software and program that are running on your computer. You can see the details of your software, such as which parts are using more memory and processor resources. (video: 1:22 min.) Customize your toolbars and the menus that open by right-clicking on the ribbon. Discover the new Command window: Build more complex drawings by using commands that apply to multiple objects at once, instead of separate commands for each object. For example, you can resize or move all objects in one step. (video: 2:08 min.) Get suggestions when you type letters or numbers into the Command window. Create drawings more easily with over a million options for text styles. In addition to displaying the most common line and arc symbols, the Symbol dialog now displays all symbols available in the current drawing. Create detailed views with precise proportions. You can easily create proportional views with the Tape Tool, adding or subtracting viewable objects as the size of your screen changes. Accessibility options: Use your keyboard and screen reader. If you have trouble using AutoCAD or are new to it, it is recommended that you use the keyboard and screen reader while you are using the software. Use third-party tools to magnify, scroll and pan your drawings. Assistive Technology Controls (ATC): Use one of the three ATC options to open and use your drawings more easily. Choose to use ATC, as usual, or switch to On or Off while using the software. When using the Command line in the drawing window, the keyboard shortcut for Backspace is Ctrl+\. For the Command
