Experimental setup / performance engineering. Electrical and Electronic Engineering. October 31, 1983. Parameter settings. Home page of eplan p8 download online bookQ: how to use ggplot2 to plot top n How can I change the sizes of the plot? I need to change the number of lines (n) from 8 to 10 Here is my code library(ggplot2) ggplot(df, aes(variable,value))+ geom_jitter(size = 0.25, colour="blue", fill = NULL) + theme(plot.background = element_rect(fill ="grey90")) A: You could create a new column in your data frame that counts how many points there are per category, then use that as a grouping variable in your ggplot call. First, we need to set up some data. I would really recommend using data.table here to make the code faster (plus it's much more efficient and is shipped with R by default). df 6d1f23a050
