## Download Driver Mustek 1200 Ub Plus For Windows 7 EXCLUSIVE

in order to install the scanner i first need to download the driver for my scanner. i already downloaded all the drivers i need for my scanner, but as mentioned, the website is not very user-friendly. i spent hours searching for the driver, and it was extremely frustrating. i found a guide that told me to download the drivers from the official website, which was the first thing i tried. even after downloading the driver i was unable to open it, so i searched the internet for an alternative method to install the drivers. i decided to write my own script and share it with the world. this script will download the drivers from the mustek website, convert them into deb files and install them. so, if you are having trouble installing the drivers, this script might help you out. here is the script: the script is a simple bash script, so you should have no problems with it. the script is written in such a way that it will also work with windows 8.1. the first thing you should do is run the script and it will tell you what it has to download and where it has to put the files. now, you should open the driver that you have downloaded and open the terminal. the terminal is the place where you have to give all the commands that are required to install the drivers. `sudo wget > download driver mustek 1200 ub plus for windows 7` the script will start downloading, and it will ask for your password. when the script is done downloading the packages, it will ask you if you want to continue. for the first time you are running the script, you need to select "yes", but after that you just need to select "no" and it will continue to install the drivers.
