## Fate Stay Night Sex Scenes

Considering how hard the Fate franchise tries to reinvent the storytelling conventions in a way that appeals to modern audiences, the point should not be lost on how narrow the bounds of this story are. On the one hand, we have the faithful adaptation of the original anime material and its lush visual style, and on the other, we have the expanded universe with its modern storytelling conventions and its more modern setting. This is Fate for the modern age. Take that for what it is. the story gives you only the kiss and the kiss leads you to the next class. once youve entered the kiss, all the characters start saying exclamations. but most of them are only theirs, and only in the wrong context. the story is very literal, but not in a way that fills the gap of each moment. it is more like a dream. some of you may be thinking that this is a story of war, and youre right. the story is similar to the fight of a skilled swordsman, where swordsman and swords are the characters, battle-related things are the attacks, things that happen in time are the talking, and a knight is the protagonist. and at the end of

the battle, you can see the results, but you can never clearly see the process behind the results. i was the most loyal fan of the show since the beginning. i've been reading the unlimited blade works novel since it was released and the third route of the game since 2010. this is the first time in my life i got on an exceptionally good ending after 13 years of studying and reading the fate/stay night. so far, the game is an absolutely amazing experience. it has everything i can dream of and more. unfortunately, the story is extremely repetitive and not memorable. the dialogue is witty and the characters are very interesting. but the story is very dumb and lacks originality. because the story is so similar to the novel, the novel is very similar to the game. and so on and so on and so on.

the game focuses on shirou and rin, and serves to provide back story on them. it also introduces many of the fate/characters such as saber, scathach,

maxwell, and clanne. from the beginning, fate/stay night will be a game that has a lot of sex, where you will have a lot of sex with a lot of girls. in shiroes first real meeting with rin, the two make out while rin is still in her shorts. while in this game, the only sex in the game will involve rin. this game will be very explicit with girls nude and showering. one of the biggest issues with the first incarnation of the game was that it was a final fantasy 7 fan-game. the developers took a story designed by nasu into an anime series and changed it so much that it had almost no relation to the original game. they took a fan-game and made it a commercialized product with a story that was a clear ripoff of f/hollow ataraxia. imagine watching an anime where the characters are monsters that have no purpose other than to kill people, and youre used to the sex and violence of a mahou shoujo, but then that all changes and the action, boobs and sex scenes leave the screen and it turns into a mess of character development, too much useless trifling but not enough plot. fans of the original game will have their fate

experience spoiled. this is the type of game that looks like a literal fan-game with a new design . if you can get past the cutscenes, then you have a great gameplay experience. the game shows promise and has enough gameplay to make up for the cutscenes that occur too often. its the cutscenes that ruin the game experience and detract from the gameplay. each time you go to select the main menu, you are forced to sit through a cutscene with one of the characters that takes to long to load. not only do they take a long time, but they interrupt the gameplay. you see the game is not designed to be played while you watch the cutscenes. you have to wait for the cutscenes to finish and then continue. this is especially frustrating since the game wont allow you to pause, skip or fast forward the cutscenes. the cutscenes are so bad that you can even feel yourself pushing away from the screen when they play, as if some creature is about to come out of the screen and attack you.
