What i want is to fill the second picker with the strings from the first picker when i select the letter "A" from the first picker. How can i achieve this with Swift? A: The great thing about Swift 3, is that you don't need to do things the hard way, and rather just use the power of the Swift data structures. In this example, I have an array of strings (let's call it "pickedStrings"). I have made a struct called "PickedString", and I am using a computed property to determine the result, based on the picked string and the array. I have made an extension for the data

In fact, most people now consider tipping a true sign of the respect they have for a dining experience. It's also a true sign of respect for the servers and their families, as they don't get paid a base salary and generally end up earning far less than service industry professionals in comparable jobs. But, like any other area of life, tipping has become corrupted. While restaurants and bars are able to successfully grow their businesses with tips, there are many others who have taken to exploiting the system and making a profit from the generosity of customers. According to the New York Department of Consumer Affairs, six studies have found that a median server earns approximately \$7.25 per hour. It's a grim reality, one in which servers don't even receive a base pay to begin with. Even with tips, the median income for a server is still below \$15,000, while a manager/cook could make around \$30,000 in a similar role. To compound the issue, service industry workers are often forced to live in the service industry, which means a significant commute and an uncertain future.

The stress associated with this can create an intense rivalry among workers that often results in them not being able to offer positive service to customers. This kind of environment can make it incredibly easy for servers to decide not to tip. So what's the answer? A tip jar works as a simple fix. Although the standard tip jars are available to servers and bartenders, they are often difficult to use, and it's not unusual for servers to steal tips from guests. Instead, it's important that servers have their own cash tip jar, which they can use to offer additional tips to grateful customers. If the server has been bringing in a consistent amount of tips throughout the day, they can consider putting their own tips into a tip jar, so that guests don't

Easy to use Calendar Creator program that will make and read text calendar in just a few mouse clicks! Easiest Calendar Creator Portable is a free program that can make and read text calendar in just a few mouse clicks! The title is self explanatory, but this software will allow you to record the duration of movies, recording events as they occur. It has a lot of options to edit or customize the look of the final program. It allows you to view video files as time interval information, in this case using time codes. It can be used to create an alarm clock, that checks when the current date was set. There's a video preview at the end of the program so you can verify the results before saving the file. Install it, test it and then decide whether you want to keep it or delete it. Note: Although this is free software, it may not work on all versions of Windows or on all PCs.

Evaluation and conclusion It worked very well for me, with no problems. There are a number of options to customize the program, which is somewhat unusual for a program that lets you create time interval recordings. It's not a complicated program to use. Evaluation and conclusion No problems at all. Easiest Calendar Creator Review Easiest Calendar Creator is a straightforward command-line tool that gives you the possibility to create a single or multiple calendars, which are saved as plain text documents. Setup and portable editions Installing this program requires minimal time and attention, thanks to the fact that there aren't unfamiliar options, mandatory software products, or third-party components involved. The source code can be found in the installed directory, which can be opened in your default text editor for closer inspection. There's also a portable edition available, called Easiest Calendar Creator Portable, which has identical options to this one. The difference is that it can be stored on a removable storage device to launch it on any PC without setup. It supports two languages for the interface (English and Portuguese), which can be accessed from two separate.exe files. How to easily create calendars The program gets launched in a Command Prompt dialog and asks you to enter any year past 1759 to instantly generate the calendar and view it in this window. Plus, it's automatically exported to a plain text document in the installed directory, whose name contains the corresponding year as well as the UI language (EN or PT). If you want to

How to easily create calendars

The program gets launched in a Command Prompt dialog and asks you to enter any year past 1759 to instantly generate the calendar and view it in this window. Plus, it's automatically exported to a plain text document in the installed directory, whose name contains the corresponding year as well as the UI language (EN or PT). If you want to generate multiple TXT documents with various years at the same time, all you have to do is create a TXT file with years in separate lines, and drag it over the CLI window to get the job done immediately. An example file is provided in the installed directory to give you a better idea of how it works.

Evaluation and conclusion

It worked smoothly in our tests, without freezing, crashing or prompting errors. Calendars were swiftly put together while CPU and RAM usage remained minimal. Unfortunately, the instructions are not explicit in the interface, but Easiest Calendar Creator can be seamlessly handled once you get the hang of it.
