The kernel handles all the low-level work of the operating system. When a computer boots, the computer's BIOS hands control to the kernel. The kernel typically loads all of the software that the computer will use into RAM. Many types of devices often communicate with the kernel through special input and output messages. These messages are the communication method that the operating system uses to connect to devices, such as a keyboard, a mouse, a hard drive, the screen, speakers, and more. 9. Install Aptitude.
