4.- Be sure to edit Boot.ini to change: Boot Volume Type to CD-ROM or DVD-ROM. Boot device to either "C:" or the drive. It's okay if the drive name is space-separated. Boot Signature on (check this box if you want to keep it). When the changes are complete, restart your computer. 5.- Be sure to make copies of both your "Program Files" and "ProgramData". Save these to your flash drive. Restore them to your computer. Notes: a) Encrypted Volumes. If you wish to encrypt a volume, you need to be able to both create and use a recovery disk or Live CD to decrypt the volume. If you have access to a trusted computer (that is not currently running Microsoft Windows), we recommend you run Disk Decryptor to decrypt the volume. b) Advanced Partition. You may need to merge an Advanced Partition into another partition if you are setting up your computer for a dual boot system. If you are in the process of setting up a dual boot system, please consult a bootable CD or DVD such as Seagate's Bootable Media. If you are running Windows 7 or earlier, make sure the manufacturer's tools are available for creating a Bootable Media. You can find out more on the Microsoft website: Bootable media. c) Unused Space. You may need to transfer empty space back to the disk if it is only showing one partition. Seagate DiscWizard 24.0.1: Easy to Use.: Like Seagate's other tools, it's intuitive and easy to use. Seagate DiscWizard allows you to create a compact file on a CD or DVD, can backup and restore to a CD or DVD, or create a Live CD from the file on the CD or DVD.. 4. Notes: a. Disk Cleanup: This tool will find and clean up any temporary files and unneeded files. DiscWizard also lets you select what to show on the main screen when you run the tool. You can select files, folders and drives. You can also select the order of what you see on the screen. b. CD/DVD Rip. This tool is no longer included in newer versions of DiskWizard. It still works
