I am setting up a project in PHP on a web server which will authenticate users through LDAP and send them an email with a link for resetting their password. If I wanted to create the email link myself how would I go about this? I would like for the email to go to an account I have set up. I understand if you don't know how to send email with PHP, you need a server service but is there any services that can act as my mail server and assist me? A: There are all kinds of options depending on how many emails you need to send from your server, and how many
